

III. CHILD FIND

In accordance with federal law, the District assumes responsibility for the location, identification and evaluation of all children birth through age 21 who reside within the district and who require special education and related services.

This includes students who are:

- (1) Advancing from grade to grade;
- (2) Enrolled by their parents in private elementary or private secondary schools, including religious schools, located in our District (regardless of the severity of their disability);
- (3) Wards of the state and children who are highly mobile, such as migrant and homeless children; and
- (4) Home-schooled.

A. RESPONSIBILITY FOR DETERMINING ELIGIBILITY

In the District, the Evaluation Team ensures that the student meets the eligibility requirements of IDEA and state regulations.

In all cases, the Evaluation Team will not determine that a student has a disability if the suspected disability is because of a lack of instruction in reading or math. If the student is not proficient in English, the District will not identify the student as disabled if the limited English proficiency (LEP) is the cause of the suspected disability.

B. CHILD IDENTIFICATION PROCESS

(1) GENERAL

The District has a child identification process that includes the location, identification and evaluation of a child suspected of having a disability. The Intervention Specialist or Special Education Coordinator coordinates the child identification process. The department and its staff use a variety of community resources and systematic activities in order to identify children requiring special services. District staff members consult with appropriate representatives of private school students attending private schools located in the District in carrying out this process. The District ensures that this process for students attending private or religious schools located in the District is comparable to activities undertaken for students with disabilities in the public schools.

(2) IDENTIFICATION OF CHILDREN BETWEEN THE AGES OF BIRTH TO AGE 3.

When the District becomes aware of a child between the ages of birth to 3 who has or may have a disability, it either:

- (a) Makes a child referral directly to the county family and children first council responsible for implementing the “Help Me Grow” (HMG) early intervention services under Part C of the IDEA; and/or
- (b) Provides the parents with the information so that they can make the referral themselves.

Parents may opt out of and/or opt not to be referred for Part C services. They may request an evaluation from the District to determine if their child has a disability that may require special education. These parents are entitled to an evaluation from the District, even if the child is between the ages of birth to 3. The District is responsible for providing an evaluation but is not responsible for the provision of FAPE for an eligible child until the child is age 3.

(3) TRANSITION TO SPECIAL EDUCATION FROM HELP ME GROW (HMG).

The District and the county family and children first council responsible for HMG have a current interagency agreement that includes processes for the referral of children from HMG to the District. The District has assigned the Director of Instruction as the primary person responsible for contact with HMG regarding children transitioning from that program.

(a) If invited by a representative of HMG (and with parent permission), a District representative attends a transition conference to discuss transition from early intervention services to preschool for a child suspected of having a disability.

(b) If the parents request, the District invites the Part C service coordinator to the initial IEP meeting.

If there is a suspected disability and the child is eligible for special education and related services as a preschool child, the District works to ensure that an IEP is in place and implemented by the child's third birthday. In the case of children who are 45 days or less from their 3rd birthdays and who are suspected of having disabilities, an evaluation is completed within 60 days of parental consent, but an IEP is not required by their third birthdays.

As part of the IEP process, the IEP team determines if extended school year services are required for the preschool child.

(4) COORDINATION WITH OTHER AGENCIES.

The District has interagency agreements with Head Start programs within the school district's service delivery that provide for:

(a) Service coordination for preschool children with disabilities, 3 through 5 years of age, in a manner consistent with the state interagency agreement for service coordination with Head Start; and

(b) Transition of children eligible for special education and related services as a preschool child at age 3.

The District also has interagency agreements with the relevant county board(s) of MR/DD for identification, service delivery and financial responsibilities to adequately serve preschool children with disabilities 3 through 5 years of age.

C. DATA COLLECTION

The District maintains an education management information system and submits data to ODE pursuant to rule 3301-14-01 of the Administrative Code. The District's collection of data

includes information needed to determine if significant disproportionality based on race and ethnicity is occurring in the District with respect to the identification of children as children with disabilities, the placement of children in educational settings and the incidence, duration and type of disciplinary actions.

VIII. PARENTALLY PLACED NONPUBLIC SCHOOL CHILDREN

A. CHILD FIND

(1) GENERALLY

The District locates, identifies and evaluates all children with disabilities who are enrolled by their parents in chartered and non-chartered nonpublic schools, including religious elementary and secondary schools located within the District's geographical boundaries.

The District consults with the nonpublic school representatives and representatives of parents of parentally placed nonpublic school children with disabilities regarding the child find process, including:

- (a) How parentally placed nonpublic school children suspected of having a disability can participate equitably; and
- (b) How parent, teachers and nonpublic school officials will be informed of the child find process.

After timely and meaningful consultation with representatives of nonpublic schools, the District carries out child find activities for parentally placed nonpublic school children, including children whose parents live out-of-state. These activities are similar to the child find activities the District conducts for its public school children and ensures an accurate count of children with disabilities. The District completes these activities in a time period comparable to that for children attending its public schools, including completing any evaluations within 60 days of receiving parental consent. See Chapter V, Section A(1).

The District follows all IDEA and FERPA confidentiality requirements when serving children with disabilities attending nonpublic schools located within the District's boundaries and obtains parental consent before releasing any personally identifiable information about a child to officials of the child's district of residence or the nonpublic school in which the child is enrolled. The District conducts, either directly or through contract, a full and individual initial evaluation of any parentally placed nonpublic school child suspected of having a disability who is enrolled in a nonpublic school within the District's boundaries. The District obtains written parental consent before conducting an initial evaluation.

- (a) If the parents of a parentally placed nonpublic school child do not provide consent or fail to respond to the District's request for consent to evaluate the child, the District may not use mediation or due process procedures to pursue the evaluation. The District does not have to consider this child as eligible for services.
- (b) If the parents do not make clear their intent to keep their child enrolled in the nonpublic school, the District provides the parents of a child who is determined to be eligible for special

education services written documentation stating that the child's school district of residence is responsible for making FAPE available to the child.

(c) The District sends a copy of this documentation to the child's district of residence, provided the District obtains written parental consent to release the information.

The District conducts reevaluations of parentally placed nonpublic school children with disabilities receiving special education and any related services to determine continued eligibility for services. The District conducts reevaluations no more than once a year, unless the parents and the District agree otherwise, and at least once every three years, unless the parents and the district agree that a reevaluation is unnecessary.
